

Office 365 Data Security Assessment

CYBER SECURITY FACTS

- Cyber risk is a business risk.
- In 2016:
 - 4.2 Billion customer records were compromised. ([Risk based Security Report – 2017](#))
 - Average cost of a security breach was 17 million. ([Ponemon Institute: Cyber crime – Nov 2016](#))
 - 99 days on average from breach to detection. ([FireEye/Mandiant report \(March 2017\)](#))
- [Security Week](#) reported that 75% of users use the same password for social and email.
- The [TeleSign Consumer Account Security Report 2016](#) revealed that 71% of accounts are guarded by passwords used across multiple sites, and 46% of users employ a password that is at least five years old.
- The [Verizon 2017 Data Breach Investigations Report](#) reveals that stolen and/or weak passwords are used in 81% of all hacking-related security breaches. The same report also reveals that 15% of phishing victims within companies of 30-plus employees fall victim to a second phishing attack.

ENGAGEMENT OUTLINE

- Kick-off Call
- Pre-Assessment Questionnaire & Discussion
- Office 365 Data Security Presentation
- Findings Report
 - Customer Security Strategy Review
 - Recommended Monitoring & Reporting
 - Remediation Checklist
 - Secure Score Review

DELIVERABLES

- Gain a mutual understanding of cloud security objectives and requirements.
- Provide guidance, recommendations and best practices on how to successfully implement Office 365 security features.
- Provide a prioritized and actionable Office 365 security roadmap.
- Map Office 365 security capabilities to customer security objectives and requirements.
- The goal of the engagement is to improve the security posture in Office 365.
