Cloud Evaluation

Do you have open questions and road blocks that are stopping your cloud deployment? We work with stakeholders to map and develop their deployment vision.

Migrations and Upgrades

In-place Upgrade? Database Attach? Third party Solution? We can assist in mapping out the most cost-effective solution to meet your business needs.

Support

Tired of waiting for a callback, or dealing with the Tier1 Team? We have resources directly from Microsoft Escalations who can help solve the most difficult support issues.

Preventive Maintenance

Tired of trying to keep SharePoint running? We develop preventive maintenance plans to match strict OLA's.

Helpdesk

We streamline your SharePoint support through custom knowledge bases, trainings, and escalation plans to drive high quality end user experience.

Training

Delivered on-site or remote, our custom training material will help any level of end-user or SharePoint Admin.

Development

From company portals to small app solutions. We assist in development and implementation of custom solutions that can solve your most technical business problems.
